

XTRACHÊNE

OAK
IS IN OUR DNA

STICKS

STICKS 22.90®

SQUARE GEOMETRY A PERFECT WOOD-WINE FUSION

The result of years of research to offer the best alternative to barrels, the **Stick 22.90®** is crafted from French or American oak, naturally seasoned in our wood yards for 24 to 36 months. It combines the traditional craftsmanship of **Chêne & Cie** in stave mills, with the expertise of the **XTRACHÊNE** team - specialists in oenological wood.

- Our traditional wood-fired toasting process is inspired by the bousinage method used in cooperage. Thanks to our exclusive toaster, we achieve unparalleled complexity and consistency.
- **XTRACHÊNE** also masters convection toasting. This process ensures deep, core-toasting of the wood, delivering both homogeneity and reproducibility. Its aim: to fully reveal the wood's organoleptic potential.
